- Tongue & groove under boarding on the overhang
- 1/2" high quality hardwood ply used for the kicking boards
- Metal skids – 4" x 4" box with 2" x 2" cross bars

6' Store Room internal

## Features

- The Horse Stables are 7'6" to the eaves and 10' to the ridge
- They are boarded on the outside and framed on the inside
- They have kicking boards to 4' high on the gable ends, front and backs and to the eaves at the partitions.
- There is a 3' under boarded overhang as standard
- There is a louvre window in the gable ends for ventilation
- 42" wide stable doors complete with heavy duty ironmongery, chew strips, kick over bolts and hook and band hinges as standard
- A clear roof sheet for light in each stabling area
- The Horse Stables do not have a floor as they are best sited on a concrete base which we can bolt the stables to if required
